Course Project Guidelines

MNY101 Money Basics. A sample document written for trying Smazy. It is not a real course.

The task

Build a one-month budget for a university student who earns 1,200 a month, and explain the choices you made. The project is worth 50% of the course grade and is due on Friday of week 4.

What to hand in

- A budget table with income, needs, wants, and savings
- A one-page explanation of your choices
- One paragraph on how the budget would change if rent rose by 10%

Guidelines

- Start from the budget example spreadsheet in the course folder.
- Use the 50 / 30 / 20 guide from Lecture 3 as a starting point, and say where you departed from it and why.
- Include an emergency fund.
- Keep the explanation to one page.
